Serhii Lutsiv

Senior Full-Stack Engineer (React, Next.js, Node.js, React Native, TypeScript, SQL & NoSQL) | Fintech & Healthcare SaaS for EU/US Clients | Open to Remote - Available Immediately
Lviv, Lviv, Ukraine

Summary

I'm a full-stack JavaScript engineer building production React/Next.js frontends and Node.js backends (NestJS, Express) for fintech, healthcare, and AI-driven SaaS teams in Germany, the US, and across the EU.I specialize in React / Next.js frontends and Node.js backends (NestJS, Express, Fastify), with strong experience in TypeScript, PostgreSQL, MongoDB, Redis, REST APIs, GraphQL, and AWS. I regularly integrate real-world services - payments, maps, auth, real-time features, and AI APIs - to make products genuinely useful. I also build cross-platform mobile apps with React Native, shipping to both iOS and Android from a single codebase. What I bring beyond the code:- Performance engineering - reduced page load times from ~3s to under 1s; cut API latency by 30% through query optimization and caching - Full ownership - architected and shipped 10+ projects across fintech, healthcare, and AI-driven SaaS, from technical spec to production deployment - Team impact - mentored junior developers, led technical discussions with international clients, and contributed to CI/CD and DevOps workflows - Real integrations - Stripe, Twilio, Google Maps, OpenAI, Firebase Auth, WebSockets, and third-party SaaS APIs Immediately available for Senior Full-Stack, Front-End, or React Native Engineer roles - remote, EU or US market preferred. Open to a quick intro call - I usually reply within a day.

Experience

Logic Craft

Senior Full Stack Developer
January 2025 - July 2026 (1 year 7 months)
Lviv, Lviv, Ukraine

- Architected and delivered full-stack features for enterprise SaaS products serving EU and US clients, owning end-to-end implementation from DB schema through React UI

- Reduced frontend load time from ~3s to <1s by introducing code splitting, lazy loading, and optimized asset delivery pipelines
- Cut API response latency by 30% through query optimization, Redis caching, and refactoring high-frequency Node.js service endpoints
- Led technical discussions with international clients (EU/US), translating business requirements into engineering decisions and sprint deliverables
- Contributed to CI/CD pipeline setup on AWS (ECS + CodePipeline), reducing deployment cycle time from hours to under 15 minutes
- Integrated OpenAI API to deliver AI-driven product features used daily by marketing teams across 3 enterprise accounts

ELEKS

Middle Full Stack Developer

November 2022 - November 2024 (2 years 1 month)

Lviv, Lviv, Ukraine

- Developed and maintained scalable UI components for fintech and healthcare clients across 2 major product lines serving mid-to-large enterprise users
- Improved frontend rendering performance by 25% through React memoization, virtualized lists, and bundle size reduction via tree-shaking
- Integrated 5+ third-party backend services (payment, auth, notification APIs), reducing integration time per service by 30% through reusable adapter patterns
- Collaborated cross-functionally with UX designers, business analysts, and DevOps to deliver 3 major product releases within sprint deadlines
- Contributed to CI/CD workflows using GitHub Actions and Docker, enabling consistent zero-downtime deployments across staging and production environments
- Participated in technical interviews and code reviews as part of team's quality assurance process

Innovecs

Junior Full Stack Developer

September 2021 - October 2022 (1 year 2 months)

Lviv, Lviv, Ukraine

- Built reusable React component libraries for 2 client-facing web applications, reducing UI development time by ~20% across subsequent sprints
- Implemented REST API integrations with Node.js/Express backends, delivering 6 end-to-end features from design mockup to production release

- Collaborated with QA engineers on test coverage for new features, maintaining a defect escape rate below 5% across 4 release cycles
- Established clean Git workflows (branching, PR reviews, conventional commits) adopted as team standard for the project codebase

Education

Lviv Polytechnic National University

Master's degree, Computer Science

Lviv Polytechnic National University

Bachelor's degree, Computer Science
